FINAL YEAR PROJECT

AGL– The Crawler Based Job Trend ANALYZER "Daryaft"

- Daryaft it is possible to know about the trending jobs in the market. The proposed system is a Web-based application where the user can view the trending jobs and technologies in the form of graphs and charts. This Crawler Based Job Trend Analyzer crawls the data from various sources and populates it in the database and then the analytical tools help to represent job trends in graphs and charts.

- Technologies used (Java, Rapid miner Studio and Server, JSoup, PHP, MySQL)

Data Collection and Data Analysis tools used for prediction of trends, ease to understand the results.
